## EDUCATION

### Izmir Katip Celebi University | Mechatronics Engineering | 2022 - Present

Fourth-year undergraduate in a degree program taught entirely in English.

### Eskisehir Osmangazi University | Architecture | 2021

Left the program after the first academic year.

## TECHNICAL PROJECTS

### GPS-Based Temperature Mapping | Arduino, NEO GPS, ESP8266 | 2025

Academic project: Integrated a NEO-series GPS module, a thermistor, and ESP8266 Wi-Fi with Arduino to collect location-tagged temperature readings while moving. Sent measurements to a PC to generate a temperature map.

### Bidirectional Wireless LED Control | Arduino, nRF24L01 | 2025

Academic project: Developed two Arduino-based units communicating bidirectionally via nRF24L01 radio modules, enabling each unit to wirelessly control the other unit's LED.

### [AdaPOS](#) | Firebase | 2025

Developed a restaurant management application for tracking tables, menus, orders, and payments. Added real-time data synchronization with Firestore, staff management, and sales reporting.

### [Tiny11 GUI](#) | PowerShell | 2026

Expanded on tiny11builder to develop a configurable Windows 11 ISO customization tool. Implemented selective app and component removal, configuration presets, a multilingual interface, and automated PowerShell/DISM workflows with live logging and failure recovery.

### DetayStudioAuto | Python, Batch | 2023

Automated photo studio archiving, file submission for printing, and photographer performance tracking with scripts. Added a Python graphical interface to simplify daily use.

### Gorleak | Python, SQLite | 2024

Identified an unprotected path exposing media files on a restricted-access website. Built a Python and SQLite tool to track new files daily, prevent duplicate records, and organize files by discovery date.

## EXPERIENCE

### SMS Savunma Sanayi | Intern | Summer 2024

Voluntarily extended a mandatory manufacturing internship. After the manufacturing placement, worked in the electronics department on coil winding, additive manufacturing of motor components, mechanical and electronic assembly, and functional testing of motors used in tanks.

### Ege Port Crew Shop | Sales Advisor | Summer 2026

Provided product information and sales support in English to international customers.

### Detay Photography | Photographer and Sales Advisor | 2022 - 2024

Worked in tourism, prom, and venue photography, alongside sales advisory duties. Developed automation tools for the studio's file organization and archiving workflows.

## TECHNICAL SKILLS AND LANGUAGE

**Programming:** C, Python, Rust, SQL

**Technologies:** Firebase, AWS Lambda

**Automation and Simulation:** TIA Portal, Factory I/O, PLCSIM, Simulink

**Tools:** Git, Linux command line, SolidWorks, Proteus

**English:** B2

## COURSES

[CS50: Introduction to Computer Science](#) | Harvard University / edX

Completed the introductory computer science course.
